

October 2007 Newsletter

I apologise for the late newsletter, as the full text is not available, some photo's will be posted.

A solar oven, made from foil and cardboard.

Hydrogen producer demonstration.

A water vortexing unit.

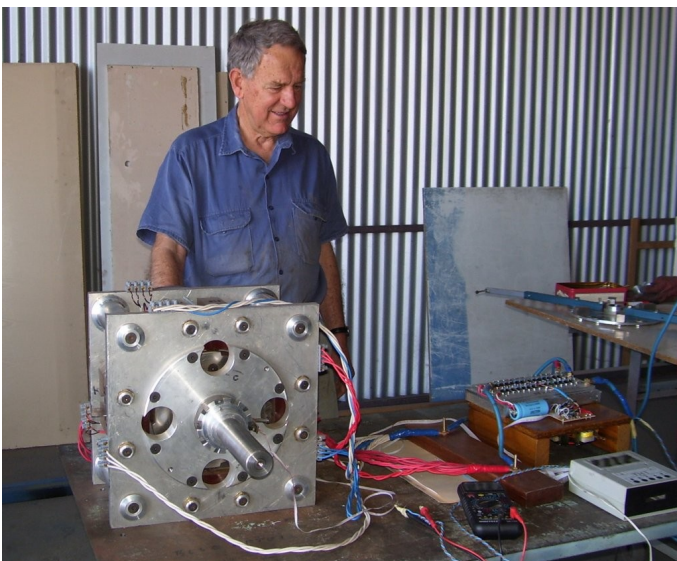

One of Andrews water purifiers.

Its a long one, if length is important it should work well!

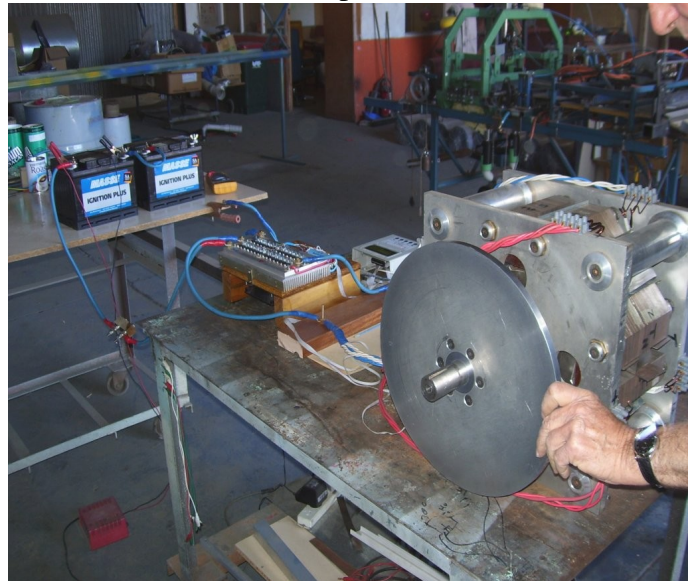

Another look at the boys in the electric sherpa from earlier this year.

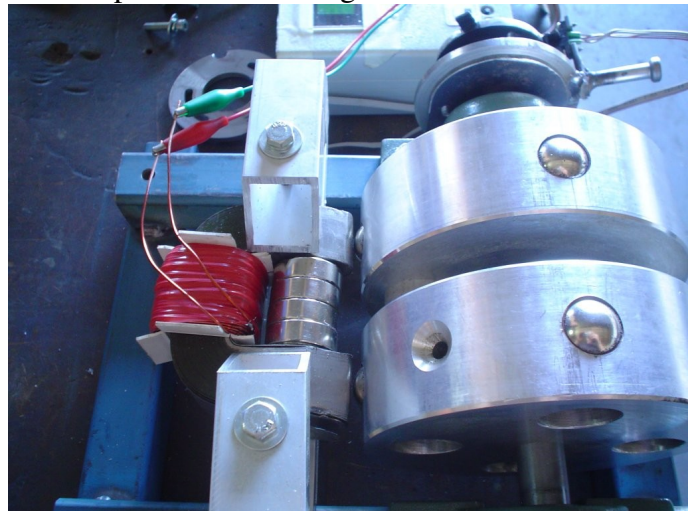

A shed photo! Warwick at work.

Ken at Warwicks workshop.

Parallel path flux switching research motor.

This motor has four 1 inch spherical magnets on the rotor fixed 90 degrees apart. The motor runs in a repulsion mode or an attraction mode with back EMF energy recovery. Designed by Jim, built by Warwick, electronics by Ken. A search on "youtube" for **tubekwk** will let you see these motors running.

Athol on the right R.I.P .
George on the left has not changed, still the same.
George when are you going to bake another cake!

I hope to add some text to this newsletter in the future.

Ken

Let's not forget old friends Percy on the right R.I.P.

Keith R.I.P
