

ASTRO S.A. Inc

HELPING TO SAVE THE PLANET

February 2008 Newsletter

The guest speaker for the January meeting was **Dr. Warwick D. Raymont, D.Sc.**

The topic:

DEATH OF A PLANET!

A History of Chemical Development and Usage, it's Impact upon Human Health and the Environment.

<http://www.stolair.com/professionalpapers/deathofaplanet.html>

The talk was excellent and enjoyed by all, it certainly opened a few eyes.

The February meeting guest speaker was **MARTIN GOTTSCHALL BE, ME, PhD, FDBA.**

To quote Martin.

Before and during my undergraduate years (the 1950's) I was intensely interested in space travel, and devoted much time and thought to methods of making rocket propulsion more efficient.

Some of the results of this work are listed below.

1. A theory on the nature of gravity I call "Electromagnetic Gravity"
2. An approach to electricity and magnetism which treats these fields as a kind of substance possessing stresses, inertia, gravity and other properties which allow the incorporation of what are presently viewed as quantum phenomena.

Martins talk was very well received, I personally have heard martin talk on many occasions and learn from each lecture, we are indeed lucky to have such a talent in our group..... Ken

This is a photo from 2006 (file copy) sorry no new photo, listening.

Trust Charlie, he is now working on a wind powered water purification system that involves wind turbines mounted on floating barges, Good luck Charlie.

out. Another new talent in our midst, Sam wants to make K.I. a showcase of renewable energy.

Note: Charlie is already involved.

Look at Dave G's thing!

Dave explains his generator concept.

What have we here? An American, from American River.....Kangaroo Island. Yes our very own K.I. and it looks like it takes a noisy Yank to sort it all

The sparks are getting bigger so it must be improving.!

Peter P sent me this link, it is worth a look.

<http://www.waterdesalination.com/>

Jim S sent a youtube link with a new type of magnetic motor, take time for a look.
